

PROMAC Final Conference

Ålesund, 8-9 November

PROMAC

We are pleased to welcome you to the PROMAC conference in Ålesund on the 8th and 9th of November for presentation of project results and networking.

The PROMAC project has been working with sustainable utilization and processing of macro algae into health promoting protein products for human food and animal feed. Several spin-off projects have also been developed from the project results in order to further explore preservation process of seaweeds after harvesting.

Program

8th November

09:00-12:30:

- Workshop on seaweed processing: results of PROMAC, ISBIT and Makroterm projects.

13:00-17:30:

- Key-notes: Presentations from the projects Macrosea (Norwegian Research Council), Macrocascade (EU) and Macrofuel (EU)
- Macroalgae – cultivation, harvesting and composition
- Processing of macroalgae into high value products

9th November

08:30-13:00:

- Macroalgae and health
- Seaweed based protein vs soybean protein as a protein source for fish feed
- How to establish a seaweed industry in Norway?

Registration fee: 650,-
Arena: NMK Ålesund

PROMAC (Energy-efficient PROcessing of MACRoalgae in blue-green value chains) is a 2015-2018 project funded by the HAVBRUK2 program from the Norwegian Research Council. The project, coordinated by Møreforskning AS, draws on key expertise from both Norwegian (SINTEF, NIBIO, NTNU and NMBU) and European (CEVA, MATIS and SLU) research institutes, as well as industrial partners (Tafjord Kraftvarme, Felleskjøpet Fôrutvikling, Firmenich, Blue Legasea, The Northern Company, Orkla Foods, Hortimare and Marinox).
